JAVASCIPT

November 2, 2021

1 WHY JAVASCIPT?

In web development, there are 3 stages to become a frontend developer. The first 2 are html and CSS; whereas Javascript is designed to make web development faster and more attractive thereby creating an effective path to becoming a front end developer. Again, Javascript is also useful in effective game development.

2 WHAT IS JAVASCRIPT?

Javascript is a scripting or programming language that allows you to implement complex features on webpages. Such features include: create dynamically updating content, control multimedia, animate images and virtually everything in web design which is not the display of static information.

3 BRIEF HISTORY OF JAVASCRIPT

Javascript was invented by *BRENDAN EICH* in September 1995 in just 10 days. It was developed for Netscape 2, and became the ECMA-262 standard in 1997. After Netscape handed Javascript over to ECMA, the Mozilla foundation continued to develop Javascript for the firefox browser . Mozilla's latest version continued to develop Javascript for the Firefox browser. Mozilla's latest version was 1.8.5
