PYTHON PROGRAMMING

November 3, 2021

1 WHY PYTHON PROGRAMMING?

This was chosen mostly due to its relatively straightforward syntax and emphasis on eliminating clutter. Fast growing python is often seen as the easiest programming language to learn. In basic terms, it is simple and adaptable as it contains lots of English words, key to aiding and helping one avoid getting lost. Again, python is basically one of the first if not the first programming languages acquired by a programmer. This goes a long way to emphasize on the necessity of the language.
(it is also important to note that python has been voted the developer's community mos wanted coding language for the past 5 years in a row)
