COMPUTER PROGRAMMING LANGUAGES

November 3, 2021

Now that we have gotten acquainted with what programming languages are, we'll look into the various computer programming languages.

1 TYPES AND EXAMPLES OF PROGRAMMING LANGUAGES

1.1 Algorithmic languages

These are languages designed to express mathematical or symbolic computations. They were the first high-level languages.

- Examples:

- FORTRAN(Formular Translator)

- ALGOL (Algorithmic language)

- The C programming language

1.2 Business-oriented languages

- Examples:

- COBOL(Common Business Oriented Language)

- SQL(Structured Query Language)
